

WEBINAR RISBANG

“PENGUATAN KOLABORASI INTERNASIONAL MULTIDIPLIN MENUJU RISET DAN INOVASI KELAS DUNIA”

RABU, 14 OKTOBER 2020

Kolaborasi Internasional dalam Peningkatan Penelitian Bidang Energi di UI

Prof. Dr.-Ing. Nasruddin, M.Eng

Departmen Teknik Mesin

Fakultas Teknik

Universitas Indonesia

Latar Belakang

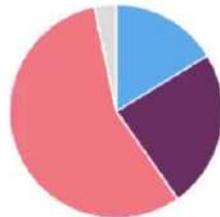

Improving Research Quality

International Research Collaboration UI vs. ASEAN Universities (2014-2019)

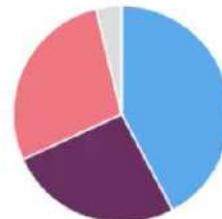

Talking: Sesi Panel_Pembicara

Universitas Indonesia

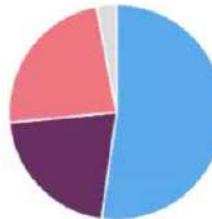

Metric	Scholarly Output	Citations
International collaboration	16.3%	2,060 22,788
Only national collaboration	24.0%	3,035 4,471
Only institutional collaboration	56.5%	7,150 9,211
Single authorship (no collaboration)	3.3%	416 570

Chulalongkorn University

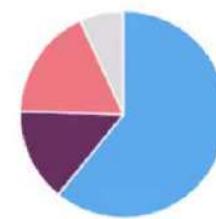

Metric	Scholarly Output	Citations
International collaboration	42.2%	6,203 78,524
Only national collaboration	26.0%	3,817 18,963
Only institutional collaboration	28.0%	4,117 17,088
Single authorship (no collaboration)	3.8%	559 1,457

University of Malaya

Metric	Scholarly Output	Citations
International collaboration	52.2%	13,947 215,677
Only national collaboration	21.2%	5,664 43,394
Only institutional collaboration	23.5%	6,272 62,044
Single authorship (no collaboration)	3.0%	809 1,956

National University of Singapore

Metric	Scholarly Output	Citations
International collaboration	60.9%	35,675 624,225
Only national collaboration	14.6%	8,529 104,049
Only institutional collaboration	17.6%	10,313 124,318
Single authorship (no collaboration)	6.9%	4,042 14,825

5+1 Tips about Effective Networking for Researchers:

Tip 1. Get started-Now

Tip 2. Be Open and Friendly

Tip 3. Give your network time to grow

Tip 4. Use online tools

Tip 5. Be Persistent

Tip 6. Internal Peer group

<https://app.enago.com/homepage/i/9360/five-tips-about-effective-networking-for-researchers>

20 benefits of collaboration you cannot afford to ignore (Scott Wavers)

1. **Higher impact of publications:** there is a direct correlation between the number of authors and impact factor.
2. **Encourages greater creativity.**
3. **Future:** those you collaborate with today will think of you tomorrow when they are putting together a € 20,000,000 grant proposal.
4. **Less work:** done well, collaboration means less work for everyone without compromising on results.
5. **Criticism:** collaborators are more likely to tell you, that in reality the emperor is not wearing any clothes. Debating ideas is also important for creativity and achieving Group Genius
6. **Ability to bring more experience to bear:** tapping into the distributed intelligence of a group increases your chances of solving problems more efficiently.
7. **Efficient learning:** Seeing how a team of experts solves a problem is the best learning that there is.
8. **Wider array of techniques:** a collaboration across lab groups, departments or institutions widens the access to a greater number of techniques used for research.
9. **Deeper research:** in a collaboration you are forced to do more than clip the top of trees with your research.
10. **Funding:** Getting funding in Europe and the US it is typically much easier in the context of a collaboration.

- 11. Increased number of publications:** is related to number 9 as the deeper the research the more publications.
- 12. Better and more concrete networks built through collaborations.**
- 13. Patents**
- 14. Higher likelihood of becoming commercial.**
- 15. More fun to be had with a team than on your own.**
- 16. Knowledge of what others are doing:** in particular by simply talking with a fellow team member on the research project.
- 17. Less risk:** there are many more degrees of freedom with a collaborative network than there are with a single lab following a single line of research.
- 18. Agility:** it is far more likely that you can exploit an unexpected finding in the setting of a collaboration.
- 19. Early adopters:** your collaboration partners are almost by definition your early adopters for your novel approach, new technology, or new hypothesis.
- 20. Impressing investors and funding agencies.**

How to build and grow an international research network

- Attend and present at conferences
- Collaborate through service appointments
- Go on an exchange
- Keep in touch
- Reach out to authors
- Develop an online presence
- Send your students on an exchange
- Invite international colleagues to thesis committees
- Take a sabbatical

Kesimpulan

How to collaborate more effectively: 5 tips for researchers

Tip 1. Be strategic – and don't overcommit

Tip 2. Create a collaboration agreement

Tip 3. Communicate your failures, not just your success

Tip 4. Embrace all types of outputs, not just papers

Tip 5. Learn what it takes to be a good team player
